Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 8-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Onodera.

Re claims 8-13, Onodera discloses (Figure 3; column 5, line 10 - column 7, line 2), an arrangement for receiving image data in the form of page description language data, converting the input page description language data to image raster (bitmap) data. The time required for this conversion is compared with the time required for transferring raster data (step S307). If the former is shorter then a new compression means is selected for the page description language data (step 307), which inherently requires the retention and storage of this data until this selection is completed. The raster data is then used to produce a printout.

Allowable Subject Matter

3. Claims 1-7 & 14-16 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1, 3, & 14 (and dependent claims 2 & 4-7), the art of record does not teach or suggest the recited comparison of the volumes of first image data and third image data, where the first image data is the originally received data and the third image data is the result of compressing second image data produced by developing the first image data, and then conditionally storing image data based on the comparison result.

Re claims 15-16, the art of record does not teach or suggest the recited conditional (based on whether image data of two previous pages are stored as second rather than first image data) comparison of first image data developing time and a second time required for printing a recording medium

Response to Arguments

5. Applicant's arguments, see Paper #7, filed 26 January 2004, with respect to claims 1-7 have been fully considered and are persuasive. The rejection of claims 1-7 & 13 has been withdrawn.

Art Unit: 2624

6. Applicant's arguments filed 26 January 2004 with respect to claims 8, 10, & 13 (and dependent claims 9 & 11-12) have been fully considered but they are not persuasive.

Re claims 8, 10, & 13, Applicant argues (Paper #7: page 8, lines 1-18 & page 10, line 11 - page 11, line 5) that the time required for transferring raster data in Onodera does not correspond to the time taken to print the data.

Examiner recognizes that the operation of transferring data is not equivalent to the operation of printing data. However, the relevant claim language "a second time required for printing with the second image data" (claim 8, lines 5-6) and "a specified second time" (claim 10, lines 7-8) are readable upon the data-transfer time in Onodera, inasmuch as taking time for this operation is clearly "required" for the printing operation as a whole and the time for the operation is "specified".

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 703-305-4390. The examiner can normally be reached on weekdays 7:00-4:30, alternate Fridays off.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center 2600 Customer Service center at 703-306-0377.
